The *Star Wars* films have provided some of the most iconic images in modern filmmaking - from the incredible shot of the Imperial Star Destroyer that opened the first film in 1977 to the Podrace in *The Phantom Menace* and the epic battle on the volcanic world of Mustafar in *Revenge of the Sith*. In each of these cases, and literally hundreds more, the model-making wizards of Industrial Light & Magic were instrumental in creating a universe full of glorious, heart-pounding illusions.

In *Sculpting a Galaxy: Inside the Star Wars Model Shop*, Lorne Peterson, one of the founding members of ILM, takes the reader on a journey through thirty years of incredible adventures, telling never-before-published stories, explaining how classic scenes were created, and how beloved models were - often from the most unexpected of parts and ingredients. Paint buckets, model car parts, and walnut shells play important roles, alongside high-tech lasers and computer graphics, in creating the familiar yet fantastic components of a galaxy far, far away.

Lavishly illustrated with more than 300 full-color photographs from the Lucasfilm Archives, this book provides an unparalleled look behind the scenes of a place that really has created magic. Lorne Peterson's warm, evocative voice and dedication to his craft inform every page, making this not just a stunning visual piece, but an epic history in its own right.
