Python: First Shot and Learning Python Programming-

If you have ever been curious to learn about coding with Python, this book will teach you what you need to know to get started.

Python is one of the most powerful programming languages out there. You can use it to program just about any kind of app or software program you need, although it isn't always the best choice depending on what you need to do. The reason that so many people prefer Python is that it is designed to use the simplest code in the fewest number of lines possible to get the job done. While not as popular a topic for books and tutorials as some of the better known languages (like C++ or JavaScript), you can use it to program just about anything. And it takes less time to learn and follow because it was designed with simplicity in mind.

With Learn Python Now, you will learn the following:

Python Components

Basic Syntax

Beyond Hello with Strings

Working with functions

Making the most with classes

Exceptions

Handling files and exceptions

Your first program!

Running your first program

Bonus gift for you!
