Bruce H. Dobkin

**The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series)** Bruce H. Dobkin  
The Second Edition of this single-authored volume integrates multiple disciplines of basic and clinical research to help clinicians further develop the best possible care for the rehabilitation of patients with neurologic diseases. From the readable descriptions of the structures and functions of pathways for movement and cognition, the reader comes to understand the potential for training induced, pharmacologic, and near-future biologic interventions to enhance recovery. Dr. Dobkin shows how functional neuroimaging serves as a marker for whether physical, cognitive, and neuromodulating therapies work and how they sculpt the plasticity of the brain. Themes, such as how the manipulation of sensory experience can serve as a formidable tool for rehabilitation, run throughout the text, built from the level of the synapse to behaviors such as grasping, walking, and thinking. From illustrating how we may one day repair the brain and spinal cord to how to retrain spared and new pathways, Dr. Dobkin draws insights from a broad swath of fundamental research to give clinicians tools they can translate into bedside practices.

The book treats the medical complications and therapeutic approaches to neurologic diseases as an interconnected matrix. The management of common medical issues, impairments, and disabilities are described across diseases. Special problems posed by patients with stroke, myelopathies, brain injury, multiple sclerosis, degenerative diseases, and motor unit disorders receive individual comment. Short-term and delayed pulse interventions for patients, along with clinical trials, are dissected and put into perspective. The First Edition of this book was titled *Neurologic Rehabilitation*. The title has been changed to reflect Dr. Dobkin's sense that fundamental research now drives the field of neurologic rehabilitation even more than it could in 1996 when the First Edition was published. The Second Edition features entirely new chapters on functional neuroimaging of recovery; neurostimulators and neuroprostheses; integration into the book of many new clinical and neuroscientific observations relevant to the clinician; and extensive updating and expansion of all chapters.

Readers, whether clinicians serving the rehabilitation team, or students or researchers in neuroscience, neurology, physical medicine, allied health, or bioengineering, will acquire new insights and tools for creative pursuits that aim to lessen the disabilities of patients.

### **From reader reviews:**

#### **Cornell Neal:**

The book *The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series)* can give more knowledge and also the precise product information about everything you want. Why then must we leave the best thing like a book *The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series)*? Wide variety you have a different opinion about e-book. But one aim that book can give many facts for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or details that you take for that, you may give for each other; it is possible to share all of these. Book *The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series)* has simple shape but you know: it has great and big function for you. You can seem the enormous world by start and read a publication. So it is very wonderful.

#### **Gayle Oconnell:**

The book with title *The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series)* has a lot of information that you can understand it. You can get a lot of gain after read this book. That book exist new information the information that exist in this reserve represented the condition of the world at this point. That is important to you to be aware of how the improvement of the world. This particular book will bring you within new era of the globalization. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

#### **Grady Comer:**

Often the book *The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series)* has a lot of information on it. So when you read this book you can get a lot of help. The book was written by the very famous author. McDougal makes some research prior to write this book. This kind of book very easy to read you will get the point easily after perusing this book.

#### **Donald Goodman:**

As a student exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the instructor want, like asked to the library. They go to there but nothing reading significantly. Any students feel that reading is not important, boring in addition to can't see colorful photos on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore, this *The Clinical Science of Neurologic Rehabilitation (Contemporary Neurology Series)* can make you sense more interested to read.
