Neuropsychological Assessment Muriel D. Lezak, Diane B. Howieson, David W. Loring

Well-known as the "bible" in its field, this text/reference has been thoroughly revised and updated by a team of internationally recognized and clinically experienced neuropsychologists. Drawing on their diverse interests, they provide authoritative, broad-based, and in-depth coverage of current research and clinical practice in neuropsychology. They have not, however, changed the book's overall organization. The first eight chapters present the knowledge base for understanding the principles and practice of patient-oriented, hypothesis-testing neuropsychological assessment. The last 12 chapters review nearly all tests and assessment techniques discussed in previous editions plus many new ones and recent revisions of older tests. The extent of the updating is apparent from the fact that approximately half of the more than 7,000 references cited appeared since the last edition was published.

Many new topics relevant to current assessment practices have been added to the 4th edition. The chapter on examination procedures, for example, now contains sections on cognitive functioning in pain and PTSD patients. The chapter on brain disorders includes new material on electrical/lighting injuries, migraine, Alzheimer's disease and other dementing disorders, and both medical and psychological treatments. The discussion of assessment procedures has been updated throughout to cover recently published test batteries used in general neuropsychological assessment (e.g., mental abilities, memory), newly developed batteries for specific issues (e.g., frontal lobe evaluation), and recent research on older neuropsychological assessment batteries. The fully revised chapter on assessing response bias describes and evaluates more than 60 tests, test combinations, and other measures for detecting questionable effort within the context of forensic neuropsychological assessment.

From reader reviews:

Samuel Stratton:

Reading a reserve tends to be new life style with this era globalization. With reading you can get a lot of information which will give you benefit in your life. Using book everyone in this world may share their idea. Ebooks can also inspire a lot of people. A lot of author can inspire their reader with their story or maybe their experience. Not only the storyline that share in the guides. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on this planet always try to improve their proficiency in writing, they also doing some study before they write with their book. One of them is this Neuropsychological Assessment.

Noah Giles:

The reason why? Because this Neuropsychological Assessment is an unordinary book that the inside of the guide waiting for you to snap it but latter it will shock you with the secret the item inside. Reading this book close to it was fantastic author who write the book in such remarkable way makes the content inside easier to understand, entertaining approach but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This phenomenal book will give you a lot of benefits than the other book include such as help improving your expertise and your critical thinking method. So , still want to postpone having that book? If I were being you I will go to the e-book store hurriedly.

Frances Barrett:

A lot of publication has printed but it differs from the others. You can get it by online on social media. You can choose the most beneficial book for you, science, amusing, novel, or whatever by simply searching from it. It is referred to as of book Neuropsychological Assessment. You can contribute your knowledge by it. Without making the printed book, it could possibly add your knowledge and make an individual happier to read. It is most important that, you must aware about e-book. It can bring you from one place to other place.

Shaun Richards:

What is your hobby? Have you heard that will question when you got learners? We believe that that concern was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as reading become their hobby. You should know that reading is very important and book as to be the thing. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You find good news or update regarding something by book. A substantial number of sorts of books that can you take to be your object. One of them is actually Neuropsychological Assessment.
