## Program Earth: Environmental Sensing Technology and the Making of a Computational Planet (Electronic Mediations) Jennifer Gabrys

Sensors are everywhere. Small, flexible, economical, and computationally powerful, they operate ubiquitously in environments. They compile massive amounts of data, including information about air, water, and climate. Never before has such a volume of environmental data been so broadly collected or so widely available.

Grappling with the consequences of wiring our world, *Program Earth* examines how sensor technologies are programming our environments. As Jennifer Gabrys points out, sensors do not merely record information about an environment. Rather, they generate new environments and environmental relations. At the same time, they give a voice to the entities they monitor: to animals, plants, people, and inanimate objects. This book looks at the ways in which sensors converge with environments to map ecological processes, to track the migration of animals, to check pollutants, to facilitate citizen participation, and to program infrastructure. Through discussing particular instances where sensors are deployed for environmental study and citizen engagement across three areas of environmental sensing, from wild sensing to pollution sensing and urban sensing, *Program Earth* asks how sensor technologies specifically contribute to new environmental conditions. What are the implications for wiring up environments? How do sensor applications not only program environments, but also program the sorts of citizens and collectives we might become?

*Program Earth* suggests that the sensor-based monitoring of Earth offers the prospect of making new environments not simply as an extension of the human but rather as new “technogeographies” that connect technology, nature, and people.

### **From reader reviews:**

#### **Michael Milliner:**

Book is actually written, printed, or outlined for everything. You can learn everything you want by a reserve. Book has a different type. As it is known to us that book is important issue to bring us around the world. Alongside that you can your reading skill was fluently. A guide Program Earth: Environmental Sensing Technology and the Making of a Computational Planet (Electronic Mediations) will make you to end up being smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think in which open or reading a new book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you searching for best book or appropriate book with you?

#### **Frances Temple:**

As people who live in the particular modest era should be up-date about what going on or facts even knowledge to make these individuals keep up with the era that is certainly always change and progress. Some of you maybe can update themselves by studying books. It is a good choice in your case but the problems coming to anyone is you don't know which one you should start with. This Program Earth: Environmental Sensing Technology and the Making of a Computational Planet (Electronic Mediations) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and need in this era.

#### **Steven Deloatch:**

The experience that you get from Program Earth: Environmental Sensing Technology and the Making of a Computational Planet (Electronic Mediations) is the more deep you looking the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to recognise but Program Earth: Environmental Sensing Technology and the Making of a Computational Planet (Electronic Mediations) giving you thrill feeling of reading. The article author conveys their point in particular way that can be understood by means of anyone who read it because the author of this e-book is well-known enough. This particular book also makes your current vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We propose you for having that Program Earth: Environmental Sensing Technology and the Making of a Computational Planet (Electronic Mediations) instantly.

#### **Jonathan Peterson:**

You can find this Program Earth: Environmental Sensing Technology and the Making of a Computational Planet (Electronic Mediations) by check out the bookstore or Mall. Just simply viewing or reviewing it can to be your solve challenge if you get difficulties for the knowledge. Kinds of this publication are various. Not only by written or printed but additionally can you enjoy this book by means of e-book. In the modern era similar to now, you just looking by your mobile phone and searching what your problem. Right now, choose

your own ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose suitable ways for you.
