Surveys in Differential Geometry, Vol. 19 (2014): Regularity and evolution of nonlinear equations

[various contributors]

This volume of *Surveys in Differential Geometry* is dedicated to the three most eminent contributors to the subject of regularity and existence of nonlinear partial differential equations, which has played such an important role in geometry. These are Richard Hamilton, Leon Simon, and Karen Uhlenbeck. Presented topics include: analysis related to minimal submanifolds, Yang-Mills theory, Kähler metrics, Monge-Ampère equations, curve flows, and general relativity.

From reader reviews:

Gertrude Call:

Reading a publication tends to be new life style in this particular era globalization. With reading you can get a lot of information that will give you benefit in your life. Together with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire their particular reader with their story or even their experience. Not only the story that share in the ebooks. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on earth always try to improve their skill in writing, they also doing some study before they write to their book. One of them is this Surveys in Differential Geometry, Vol. 19 (2014): Regularity and evolution of nonlinear equations.

Julie Bell:

The reason why? Because this Surveys in Differential Geometry, Vol. 19 (2014): Regularity and evolution of nonlinear equations is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will shock you with the secret it inside. Reading this book beside it was fantastic author who all write the book in such incredible way makes the content interior easier to understand, entertaining means but still convey the meaning entirely. So , it is good for you because of not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book have got such as help improving your talent and your critical thinking technique. So , still want to hold off having that book? If I were you I will go to the book store hurriedly.

Martin Thomas:

Your reading 6th sense will not betray an individual, why because this Surveys in Differential Geometry, Vol. 19 (2014): Regularity and evolution of nonlinear equations reserve written by well-known writer who really knows well how to make book that can be understand by anyone who else read the book. Written inside good manner for you, dripping every ideas and composing skill only for eliminate your personal hunger then you still skepticism Surveys in Differential Geometry, Vol. 19 (2014): Regularity and evolution of nonlinear equations as good book but not only by the cover but also from the content. This is one e-book that can break don't evaluate book by its deal with, so do you still needing one more sixth sense to pick this!?! Oh come on your examining sixth sense already told you so why you have to listening to an additional sixth sense.

Cassandra Sanderson:

Are you kind of active person, only have 10 or maybe 15 minute in your day time to upgrading your mind skill or thinking skill possibly analytical thinking? Then you are experiencing problem with the book compared to can satisfy your limited time to read it because all this time you only find book that need more time to be read. Surveys in Differential Geometry, Vol. 19 (2014): Regularity and evolution of nonlinear

equations can be your answer because it can be read by you actually who have those short spare time problems.
