Highway Bridge Superstructure Engineering: LRFD Approaches to Design and Analysis Narendra Taly

A How-To Guide for Bridge Engineers and Designers

Highway Bridge Superstructure Engineering: LRFD Approaches to Design and Analysis provides a detailed discussion of traditional structural design perspectives, and serves as a state-of-the-art resource on the latest design and analysis of highway bridge superstructures. This book is applicable to highway bridges of all construction and material types, and is based on the load and resistance factor design (LRFD) philosophy. It discusses the theory of probability (with an explanation leading to the calibration process and reliability), and includes fully solved design examples of steel, reinforced and prestressed concrete bridge superstructures. It also contains step-by-step calculations for determining the distribution factors for several different types of bridge superstructures (which form the basis of load and resistance design specifications) and can be found in the *AASHTO LRFD Bridge Design Specifications*.

Fully Realize the Basis and Significance of LRFD Specifications

Divided into six chapters, this instructive text:

- Introduces bridge engineering as a discipline of structural design
- Describes numerous types of highway bridge superstructures systems
- Presents a detailed discussion of various types of loads that act on bridge superstructures and substructures
- Discusses the methods of analyses of highway bridge superstructures
- Includes a detailed discussion of reinforced and prestressed concrete bridges, and slab-steel girder bridges

Highway Bridge Superstructure Engineering: LRFD Approaches to Design and Analysis can be used for teaching highway bridge design courses to undergraduate- and graduate-level classes, and as an excellent resource for practicing engineers.

From reader reviews:

Dennis Boone:

What do you consider book? It is just for students since they're still students or it for all people in the world, what best subject for that? Just simply you can be answered for that issue above. Every person has various personality and hobby for each other. Don't to be obligated someone or something that they don't want do that. You must know how great and also important the book Highway Bridge Superstructure Engineering: LRFD Approaches to Design and Analysis. All type of book could you see on many resources. You can look for the internet sources or other social media.

Shelly Gomes:

The book untitled Highway Bridge Superstructure Engineering: LRFD Approaches to Design and Analysis contain a lot of information on the idea. The writer explains her idea with easy approach. The language is very clear and understandable all the people, so do not worry, you can easy to read it. The book was published by famous author. The author will bring you in the new time of literary works. You can easily read this book because you can keep reading your smart phone, or product, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official website in addition to order it. Have a nice examine.

Thomas Garrett:

Do you like reading a guide? Confuse to looking for your selected book? Or your book was rare? Why so many concern for the book? But just about any people feel that they enjoy with regard to reading. Some people likes studying, not only science book but also novel and Highway Bridge Superstructure Engineering: LRFD Approaches to Design and Analysis or even others sources were given know-how for you. After you know how the good a book, you feel wish to read more and more. Science reserve was created for teacher or students especially. Those publications are helping them to bring their knowledge. In other case, beside science publication, any other book likes Highway Bridge Superstructure Engineering: LRFD Approaches to Design and Analysis to make your spare time much more colorful. Many types of book like this one.

Robert Berman:

What is your hobby? Have you heard that will question when you got college students? We believe that that query was given by teacher on their students. Many kinds of hobby, Every person has different hobby. So you know that little person like reading or as looking at become their hobby. You have to know that reading is very important and also book as to be the thing. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You discover good news or update about something by book. Different categories of books that can you go onto be your object. One of them is actually Highway Bridge Superstructure Engineering: LRFD Approaches to Design and Analysis.
