Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series)

Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series)

The growing interest in using combination drugs to treat various complex diseases has spawned the development of many novel statistical methodologies. The theoretical development, coupled with advances in statistical computing, makes it possible to apply these emerging statistical methods in *in vitro* and *in vivo* drug combination assessments. However, despite these advances, no book has served as a single source of information for statistical methods in drug combination research, nor has there been any guidance for experimental strategies.

Statistical Methods in Drug Combination Studies fills that gap, covering all aspects of drug combination research, from designing *in vitro* drug combination studies to analyzing clinical trial data. Featuring contributions from researchers in industry, academia, and regulatory agencies, this comprehensive reference:

- Describes statistical models used to characterize dose–response patterns of monotherapies and evaluate the combination drug synergy
- Offers guidance for estimating interaction indices and constructing their associated confidence intervals to assess drug interaction
- Introduces a practical and innovative Bayesian approach to Phase I cancer trials, including actual trial examples to illustrate use
- Examines strategies in the fixed-dose combination therapy clinical development via case studies stemming from regulatory reviews
- Evaluates computational tools and software packages used to apply novel statistical methods in combination drug development

Statistical Methods in Drug Combination Studies provides researchers with a solid understanding of the available statistical methods and computational tools and how to apply them in drug combination studies. The book is equally useful for statisticians to become better equipped to deal with drug combination study design and analysis in their practice.

From reader reviews:

Robert Penrose:

Here thing why this particular Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) are different and trusted to be yours. First of all reading through a book is good nonetheless it depends in the content of the usb ports which is the content is as scrumptious as food or not. Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) giving you information deeper since different ways, you can find any e-book out there but there is no publication that similar with Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series). It gives you thrill studying journey, its open up your own personal eyes about the thing that will happened in the world which is maybe can be happened around you. It is possible to bring everywhere like in playground, café, or even in your way home by train. When you are having difficulties in bringing the printed book maybe the form of Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) in e-book can be your substitute.

Aubrey Smith:

Reading a reserve tends to be new life style with this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Having book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Many author can inspire their own reader with their story or their experience. The authors nowadays always try to improve their skill in writing, they also doing some analysis before they write with their book. One of them is this Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series).

Sergio Espinoza:

The actual book Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) has a lot info on it. So when you make sure to read this book you can get a lot of advantage. The book was published by the very famous author. Mcdougal makes some research prior to write this book. That book very easy to read you can find the point easily after reading this article book.

Ruth Davis:

Is it you who having spare time and then spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something new? This Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) can be the answer, oh how comes? The new book you know. You are and so out of date, spending your extra time by reading in this completely new era is common not a nerd activity. So what these ebooks have than the others?
