Baby Einstein: El mundo de color de Van Gogh introduces children to the concept of color through the great artist's paintings. Van Gogh's work contains many strong patterns and a bold use of color, making it the perfect vehicle for children to find primary and secondary colors: red, orange, yellow, green, blue, and purple. Featuring the Baby Einstein painting goat (complete with palette and bandaged ear), the six tabbed sections each contain one painting, a series of questions involving the use of color, and an inspiring quote from the artist himself. The bright, happy scenes depicted make this a favorite with little ones. This Spanish-language book is an engaging tool that provides numerous opportunities for parents to playfully interact with their children, and ideas for parents are even listed on the back.
