Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency: Skills and Practices (Norton Series on Interpersonal Neurobiology) Noah Hass-Cohen, Joanna Clyde Findlay

Presenting a neuroscientifically aware approach to art therapy.

Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency offers a comprehensive integration of art therapy and interpersonal neurobiology. It showcases the Art Therapy Relational Neuroscience (ATR-N) theoretical and clinical approach, and demonstrates how it can be used to help clients with autobiographical memory, reflecting and creating, touch and space, meaning-making, emotions, and dealing with long-term stress and trauma.

The ATR-N approach, first developed by Noah Hass-Cohen, is comprised of six principles: Creative Embodiment, Relational Resonating, Expressive Communicating, Adaptive Responding, Transformative Integrating, and Empathizing and Compassion (CREATE). The chapters in this book are organized around these CREATE principles, demonstrating the dynamic interplay of brain and bodily systems during art therapy.

Each chapter begins with an overview of one CREATE principle, which is then richly illustrated with therapeutic artwork and intrapersonal reflections. The subsequent discussion of the related relational neuroscience elucidates how the ATR-N work is grounded in research and evidence-based theory. The last section of each chapter, which is devoted to clinical skills and applications, integrates practices and approaches across all six of the CREATE principles, demonstrating how therapeutic art making can help people decipher the functional mystery of their relational nervous system, enhance their emotive and cognitive abilities, and increase the motivation to learn novel concepts and participate in a meaningful social discourse.

From reader reviews:

Celeste Silver:

Book is to be different for each and every grade. Book for children till adult are different content. As we know that book is very important normally. The book Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency: Skills and Practices (Norton Series on Interpersonal Neurobiology) had been making you to know about other information and of course you can take more information. It is very advantages for you. The book Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency: Skills and Practices (Norton Series on Interpersonal Neurobiology) is not only giving you considerably more new information but also to become your friend when you sense bored. You can spend your spend time to read your e-book. Try to make relationship with the book Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency: Skills and Practices (Norton Series on Interpersonal Neurobiology). You never really feel lose out for everything when you read some books.

Shay Price:

The reason why? Because this Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency: Skills and Practices (Norton Series on Interpersonal Neurobiology) is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will distress you with the secret the idea inside. Reading this book close to it was fantastic author who have write the book in such remarkable way makes the content on the inside easier to understand, entertaining method but still convey the meaning fully. So , it is good for you because of not hesitating having this any more or you going to regret it. This book will give you a lot of gains than the other book have such as help improving your skill and your critical thinking technique. So , still want to hold off having that book? If I had been you I will go to the publication store hurriedly.

Bert Ferguson:

Playing with family in a park, coming to see the water world or hanging out with pals is thing that usually you have done when you have spare time, and then why you don't try point that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency: Skills and Practices (Norton Series on Interpersonal Neurobiology), you could enjoy both. It is excellent combination right, you still need to miss it? What kind of hang type is it? Oh occur its mind hangout folks. What? Still don't obtain it, oh come on its referred to as reading friends.

Harriet Dupree:

As a student exactly feel bored to reading. If their teacher requested them to go to the library as well as to

make summary for some e-book, they are complained. Just tiny students that has reading's internal or real their interest. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that looking at is not important, boring along with can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency: Skills and Practices (Norton Series on Interpersonal Neurobiology) can make you sense more interested to read.
