El término "epilepsia se deriva de la palabra griega Epilambanein, que significa "ser atacado o tomado por sorpresa". Los primeros reportes acerca de esta enfermedad aparecieron en Mesopotamia hacia el 2000 a. C. En la antigua Grecia se le atribuía un origen divino y se denominaba "enfermedad sacra". Posteriormente, Hipócrates estuvo en desacuerdo con respecto al origen divino de la epilepsia, y fue el primero en hacer una aproximación científica de esta condición: atribuyó la etiología de la epilepsia a una disfunción cerebral, indicó un posible origen hereditario, relacionó la vida intrauterina con la enfermedad e introdujo la idea de una epilepsia traumática.
