# Stimson's Introduction to Airborne Radar (Electromagnetics and Radar)

## Stimson's Introduction to Airborne Radar (Electromagnetics and Radar)

Has any technical book, radar or otherwise, presented the fundamentals and applications of a topic with such clarity and interest as George Stimson's masterpiece has? Over 50,000 happy Stimson owners would say, "Not likely!" Now a skilled and respected team of radar and EW engineers, working closely with a community of radar advisors and the publisher's editors, have fully modernized coverage and maintained the unique Stimson look and feel. Even the "timeless principles" and core fundamentals of general radar have been updated in wording and new graphics, while the more advanced concepts and applications in airborne radar have been brought into the digital age of radar signal processing and solid state electronics.

Stimson's is written specifically as an overview without going overboard on the math. Virtually anybody with a knowledge of high school algebra, trigonometry, and physics will be able to read and absorb the vast majority of the material. Living up to its moniker of "Introduction," Stimson's contains extensive fundamental materials and practical applications, using visual system exemplars to aid explanations. The unique full color layout is enhanced with an immense number of illustrations, figures, tables, and color photographs.

Chapter exercises are an important addition for training and undergraduate academic courses.

### KEY FEATURES

- \* Completely covers the wide range of techniques employed in modern airborne and space borne radars.
- \* Fulfills the needs of those who want to learn about radar, regardless of their technical background.
- \* Fundamentals are applicable to ground-based radar as well.
- \* Clear, understandable writing supplemented by extensive graphic illustration of concepts and offset boxes taking those concepts to higher levels.
- \* All chapters have been modified, some heavily, to remove legacy material and include modern radar techniques.
- \* Two new sections have been added, covering electronic warfare, and special/advanced topics.

### **From reader reviews:**

#### **Bridget Chacon:**

Nowadays reading books be than want or need but also be a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book this improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want have more knowledge just go with education and learning books but if you want feel happy read one with theme for entertaining such as comic or novel. Often the Stimson's Introduction to Airborne Radar (Electromagnetics and Radar) is kind of book which is giving the reader unforeseen experience.

#### **Kathleen Sinclair:**

Hey guys, do you desires to finds a new book to learn? May be the book with the concept Stimson's Introduction to Airborne Radar (Electromagnetics and Radar) suitable to you? Typically the book was written by well-known writer in this era. The actual book untitled Stimson's Introduction to Airborne Radar (Electromagnetics and Radar) is the main one of several books which everyone read now. This particular book was inspired lots of people in the world. When you read this book you will enter the new age that you ever know just before. The author explained their thought in the simple way, so all of people can easily to comprehend the core of this guide. This book will give you a wide range of information about this world now. To help you see the represented of the world within this book.

#### **Robert Marshall:**

People live in this new moment of lifestyle always try to and must have the extra time or they will get wide range of stress from both way of life and work. So , whenever we ask do people have spare time, we will say absolutely sure. People is human not just a robot. Then we consult again, what kind of activity do you possess when the spare time coming to you actually of course your answer will probably unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative with spending your spare time, typically the book you have read is actually Stimson's Introduction to Airborne Radar (Electromagnetics and Radar).

#### **Thomas Rice:**

Do you like reading a book? Confuse to looking for your best book? Or your book has been rare? Why so many query for the book? But any people feel that they enjoy for reading. Some people likes reading through, not only science book but also novel and Stimson's Introduction to Airborne Radar (Electromagnetics and Radar) or others sources were given knowledge for you. After you know how the great a book, you feel need to read more and more. Science guide was created for teacher or perhaps students especially. Those textbooks are helping them to put their knowledge. In some other case, beside science e-book, any other book likes Stimson's Introduction to Airborne Radar (Electromagnetics and Radar) to make your spare time far more colorful. Many types of book like here.
