**Spring Data** Mark Pollack, Oliver Gierke, Thomas Risberg, Jon Brisbin, Michael Hunger

You can choose several data access frameworks when building Java enterprise applications that work with relational databases. But what about big data? This hands-on introduction shows you how Spring Data makes it relatively easy to build applications across a wide range of new data access technologies such as NoSQL and Hadoop.

Through several sample projects, you'll learn how Spring Data provides a consistent programming model that retains NoSQL-specific features and capabilities, and helps you develop Hadoop applications across a wide range of use-cases such as data analysis, event stream processing, and workflow. You'll also discover the features Spring Data adds to Spring's existing JPA and JDBC support for writing RDBMS-based data access layers.

- Learn about Spring's template helper classes to simplify the use of database-specific functionality
- Explore Spring Data's repository abstraction and advanced query functionality
- Use Spring Data with Redis (key/value store), HBase(column-family), MongoDB (document database), and Neo4j (graph database)
- Discover the GemFire distributed data grid solution
- Export Spring Data JPA-managed entities to the Web as RESTful web services
- Simplify the development of HBase applications, using a lightweight object-mapping framework
- Build example big-data pipelines with Spring Batch and Spring Integration

### **From reader reviews:**

#### **Kurt Gomez:**

In other case, little people like to read book Spring Data. You can choose the best book if you love reading a book. So long as we know about how is important a book Spring Data. You can add information and of course you can around the world by just a book. Absolutely right, mainly because from book you can recognize everything! From your country until finally foreign or abroad you will end up known. About simple matter until wonderful thing you can know that. In this era, we are able to open a book or maybe searching by internet system. It is called e-book. You should use it when you feel uninterested to go to the library. Let's go through.

#### **Kimberly Smith:**

Playing with family in a park, coming to see the sea world or hanging out with pals is thing that usually you will have done when you have spare time, then why you don't try issue that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Spring Data, it is possible to enjoy both. It is very good combination right, you still would like to miss it? What kind of hang-out type is it? Oh come on its mind hangout fellas. What? Still don't obtain it, oh come on its known as reading friends.

#### **James Hudson:**

That publication can make you to feel relax. This specific book Spring Data was colourful and of course has pictures around. As we know that book Spring Data has many kinds or variety. Start from kids until teens. For example Naruto or Detective Conan you can read and believe you are the character on there. So , not at all of book are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading that will.

#### **Brenda Lewis:**

A lot of publication has printed but it is different. You can get it by online on social media. You can choose the best book for you, science, comedy, novel, or whatever by means of searching from it. It is called of book Spring Data. You can contribute your knowledge by it. Without making the printed book, it could add your knowledge and make you happier to read. It is most critical that, you must aware about publication. It can bring you from one location to other place.
